

# B.A.A. CLUB BULLETIN

Vol. V - No. 12

August 1957

Editor- I. Reinagel

ELLCOTT CREEK PARK SITE CLEARED FOR I.G.Y.'S METEOR AND AURORAL COMMITTEES

## GENERAU'S SOLAR SOCIAL

In the July bulletin, we scheduled this event for August 3rd. Please correct and change your memo to the following Saturday: August 10th.

There is still time to mail or phone your registrations to Mr. Generau. (RI 5984).

They must reach him before August 2nd, as he leaves Buffalo on that date. Please make matters easier by letting us know if you are coming.

Everybody, be they in the association or not, is welcome to ALL our activities throughout the year. Make it a point to attend as many as you possibly can.

## CONVENTION NOTES

This is your last chance to get in the swing with the I.G.Y. National Convention in late August. You can obtain information on transportation and activities from this paper. If you are not attending you can have all published Convention notes sent to your home at no cost.

This will be the greatest symposium of the century as it coincides with I.G.Y. Don't miss out!

## STAR PARTY AT KIRCHGESSNER'S

As usual, the moon will interfere, making parties impossible early in August. Later this month, though, (August 19 to be exact) Bob Kirchgessner will have a party at his parent's farm in Colden where several previous parties were held.

Those unfamiliar with the terrain in that area may call this paper or a club member for directions.

If weather makes observation difficult, the party will be postponed to the IMMEDIATELY following evening offering clear skies.

## ITEMS FOR SALE

6" Lathe by Crestman. Includes 4 jaw chuck and set of tools. Less motor.

9" Drill press by Dunlop. 1/2" chuck. Less drills and motor.

Both in excellent condition. For further information, call: Ron Clippinger- TA 2296.

We are interested in your comments on this paper. Drop a postcard to us, telling how you think the paper can be improved.

## PERMISSION GRANTED FOR USE THROUGHOUT YEAR

Those familiar with the park know its usefulness especially for auroral observations. It is a convenient location with a good horizon and close shelter.

Now all we need are a few hardy men to "rough it" out there. If you are one of those gifted individuals, drop a line to this paper. I can personally guarantee that we will have a use for you.

## MOONWATCH ALERT TURNOUT ENCOURAGING

The national alert for I.G.Y. was adequately observed here in Buffalo. Over 70% of the Moonwatch's 15 listed members showed up at the Clarence station July 19 for sunset observations.

At the time, we were caught short with only one operating scope but by next alert, four and possibly six telescopes will be completed.

Many thanks to those on the crew who have to bear patiently with these delays. It is you who keep Buffalo on the map. (I.G.Y.'s, that is).

Have you heard or have you seen anything interesting???? Tell us about it!

Why Don't You
