JUNE 1966

BUFFALO ASTRONOMICAL ASSOCIATION

B. COOK EDITOR

JUNE MEETING

The final meeting of the current season will be held on June 10th at the Buffalo Museum of Science. We will hold our annual election of officers for a term of two years. Ernst Both, chairman of the nomination committee will present the following slate:

President: Ronald Clippinger

Vice President: Edith Geiger

Secretary: Richard Zygmunt

Treasurer: Paul Redding.

There will also be year end reports of officers, section leaders and committee heads. The meeting will be terminated with a refreshment and social hour.

GROVER CLIPPINGER

It is with deep regret that we announce the death of our president's father, Grover Clippinger, on May 4th. He has been an interested member of our organization for the past eight years and added much to the friendly atmosphere of the B.A.A. We shall all miss his genial smile and his kindness. We wish to express our sincere sympathy to Ron and his family.

STAR NIGHTS

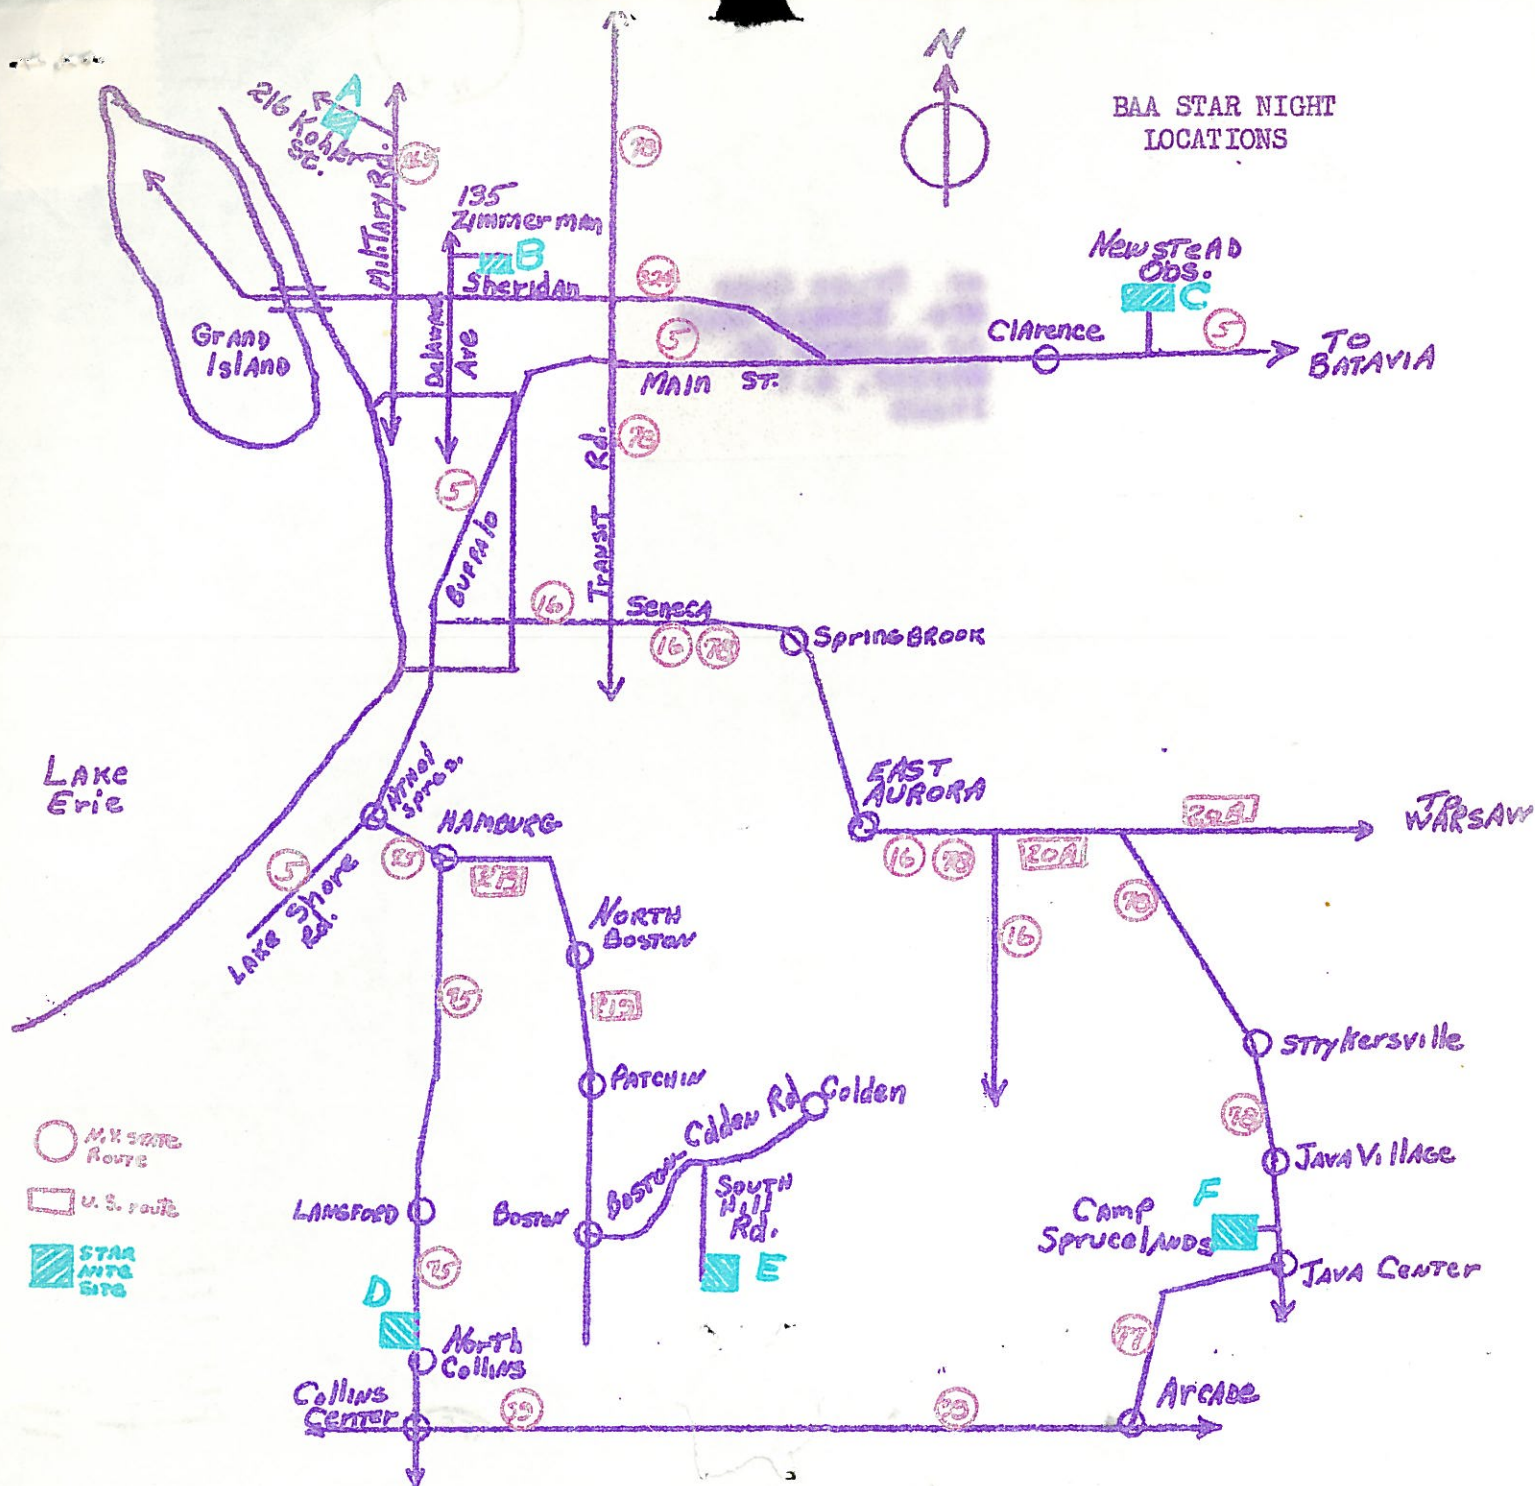

With the coming of summer the activities of the B.A.A. change from formal meetings to "Star Nights" held at various places in our area. A list of these, together with a map indicating their locations is included in this issue of The Spectrum.

Of particular interest is the solar party at Walter Semerau's home. This meeting starts at 10:30 A.M. and continues through the afternoon. Members attending are requested to bring a box lunch. The Semeraus have graciously offered to provide punch.

There will be two parties at Spruce-lands. The camp officials are anxious to make them real festive occasions. A new hill has been selected for astronomical activities and an observatory has been built. We are invited to come early and explore some new nature trails.

L. HAZEL JOINS NAVY

Lawrence Hazel, who spoke to us on his activities as a variable star observer, has just gone into the service. He will do navigation work in the Navy. We wish him good luck and look forward to his return.

DATE	LOCATION	MAP DESIG.	MILEAGE FROM BUFFALO	TIME
June 24 or 25	Newstead Observatory	'C'	20 miles	8:30 PM
July 8 or 9	Newstead Observatory	'C'	20 miles	8:30 PM
