MAY 1967

BUFFALO ASTRONOMICAL ASSOCIATION INC.

EDITOR B. COOK

## MAY MEETING

On the twelfth of May the Buffalo Astronomical Association will have its meeting before the convention of the Northeast Region of the Astronomical League. All preliminary arrangements have been made by our board of directors and the various charmen. It is now necessary for the full membership to participate in the final arrangements and sign up for volunteer services. The cooperation of member every member will be needed to make this convention a success.

The meeting will start at 8:00 and will be followed by the usual coffee hour.

## ADVANCED STUDY SECTION

The final meeting for the current season of the Advanced Study Section was held on April 28th in the Buffalo Museum of Science. The subject discussed was "The Interiors of Stars". Ron Clippinger brought his recording of the Television lecture on the subject. This was followed by a very informative clarification of some questions that arose as a result of the playing of the tape and the members' reading on the subject.

## TELESCOPE and OBSERVATORY

Volunteers are needed. Several of our members have worked hard this spring getting the telescope and observatory in order. Neither are in the beautiful shape we dreamed about but they will be operational for the convention. We hope that our will inspire other members to pitch in and complete a fine facility. A good club observatory will be of much pleasure to us for future star parties and other activities as well. We can still use a few more huskies for the next two or three Saturdays. There is painting, roof repairing, window washing and general cleaning and repairing to be done. Come out some Saturday morning and give us a hand.

## CONVENTION TASKS

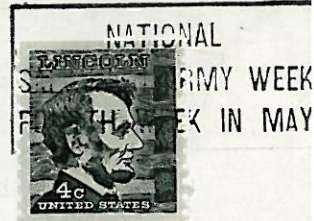

There are a lot of tasks for which volunteers are needed at the convention. If you feel that you could handle one or more of these jobs, make yourself known to one of the board members:

1. Opening the observatory Friday evening.

2. Closing the observatory Friday late night. (One or both of the above could be combined with helping Ernie Okonski to park cars.)

3. Observatory guides to explain and supervise the operation of the telescope.
4. Someone to meet incoming exhibitors at the Hotel Statler on Friday evening.
5. Someone to stay at the registration desk on Friday evening.
6. One or more people to guard exhibits on Saturday.
7. Someone to make, lend or donate benches or folding chairs for the observatory.
8. Someone to install a new lock on the observatory door.
9. Transportation: We will need cars on Friday evening and during the day on Sunday.

NORTHEASTERN REGION CONVENTION  
ASTRONOMICAL LEAGUE  
MAY 26-28, 1967
