JULY - AUGUST 1971

**SUMMER STARNIGHTS:** During the summer we traditionally hold "Star Nights" at various dark-sky localities around Buffalo (see maps elsewhere in this issue). These meetings are designed to get to know fellow members and their instruments and as such they are quite informal. Observing sessions are held Fridays, or if cloudy, Saturdays. They usually begin at dusk and continue well into the night. Members are encouraged to bring their instruments as well as their friends. We hope for especially good turn-outs this season - HAPPY OBSERVING! The following star nights have been scheduled:

Les Stoklosa's summer home, Colden, N.Y. = July 2, 3.

Newstead Observatory = July 9, 10; July 30, 31.

Camp Sprucelands, Hilltop Observatory = July 16, 17; August 20, 21.

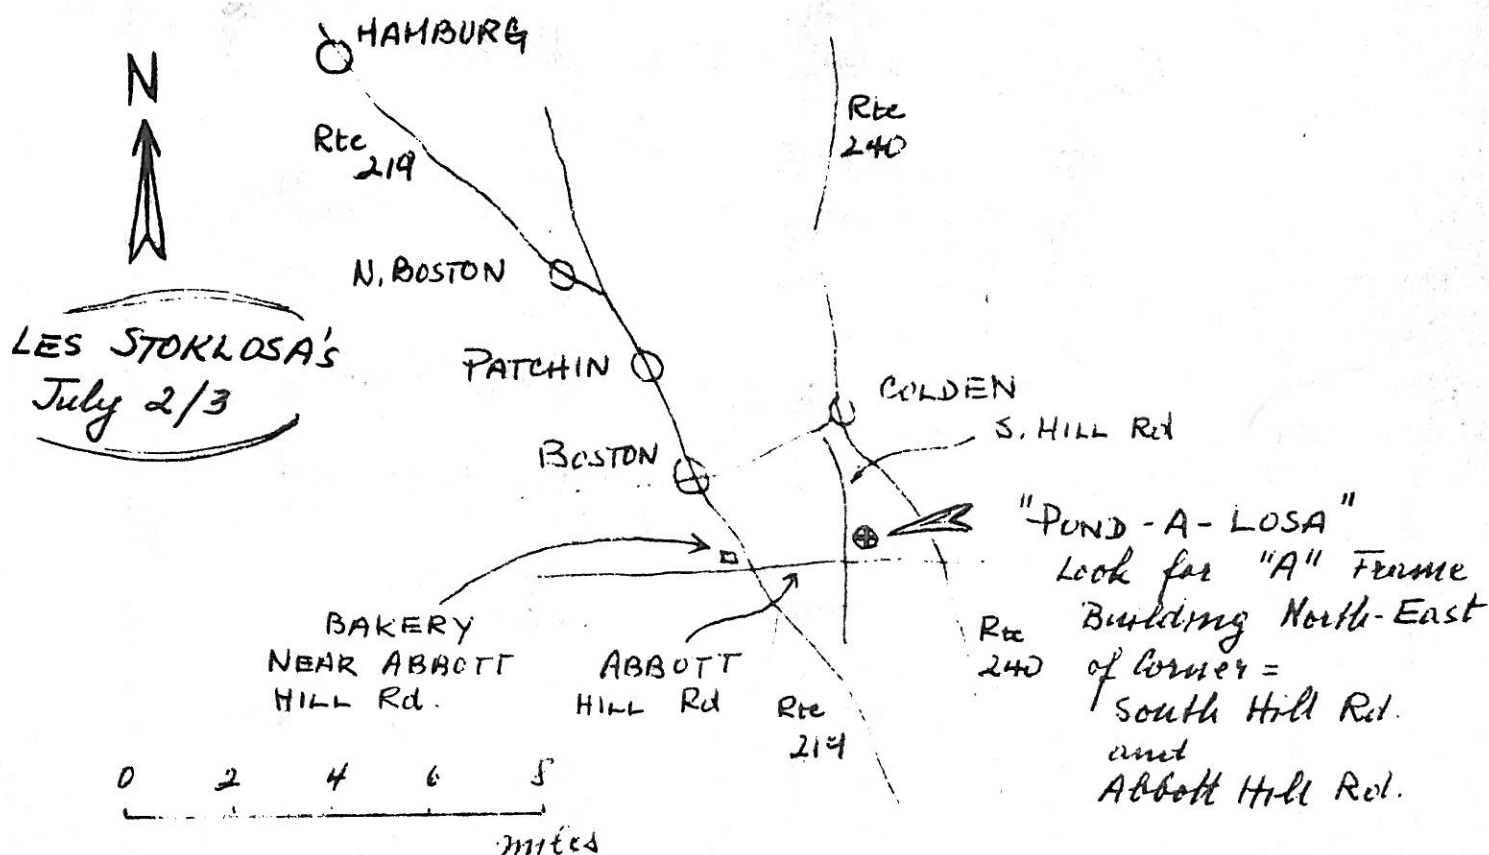

Irv Goetz's Observatory, Hamburg, N.Y. = July 23, 24.

Kellogg Observatory, Buffalo Museum of Science = August 6, 7 (Observing Mars, 9:00 PM)

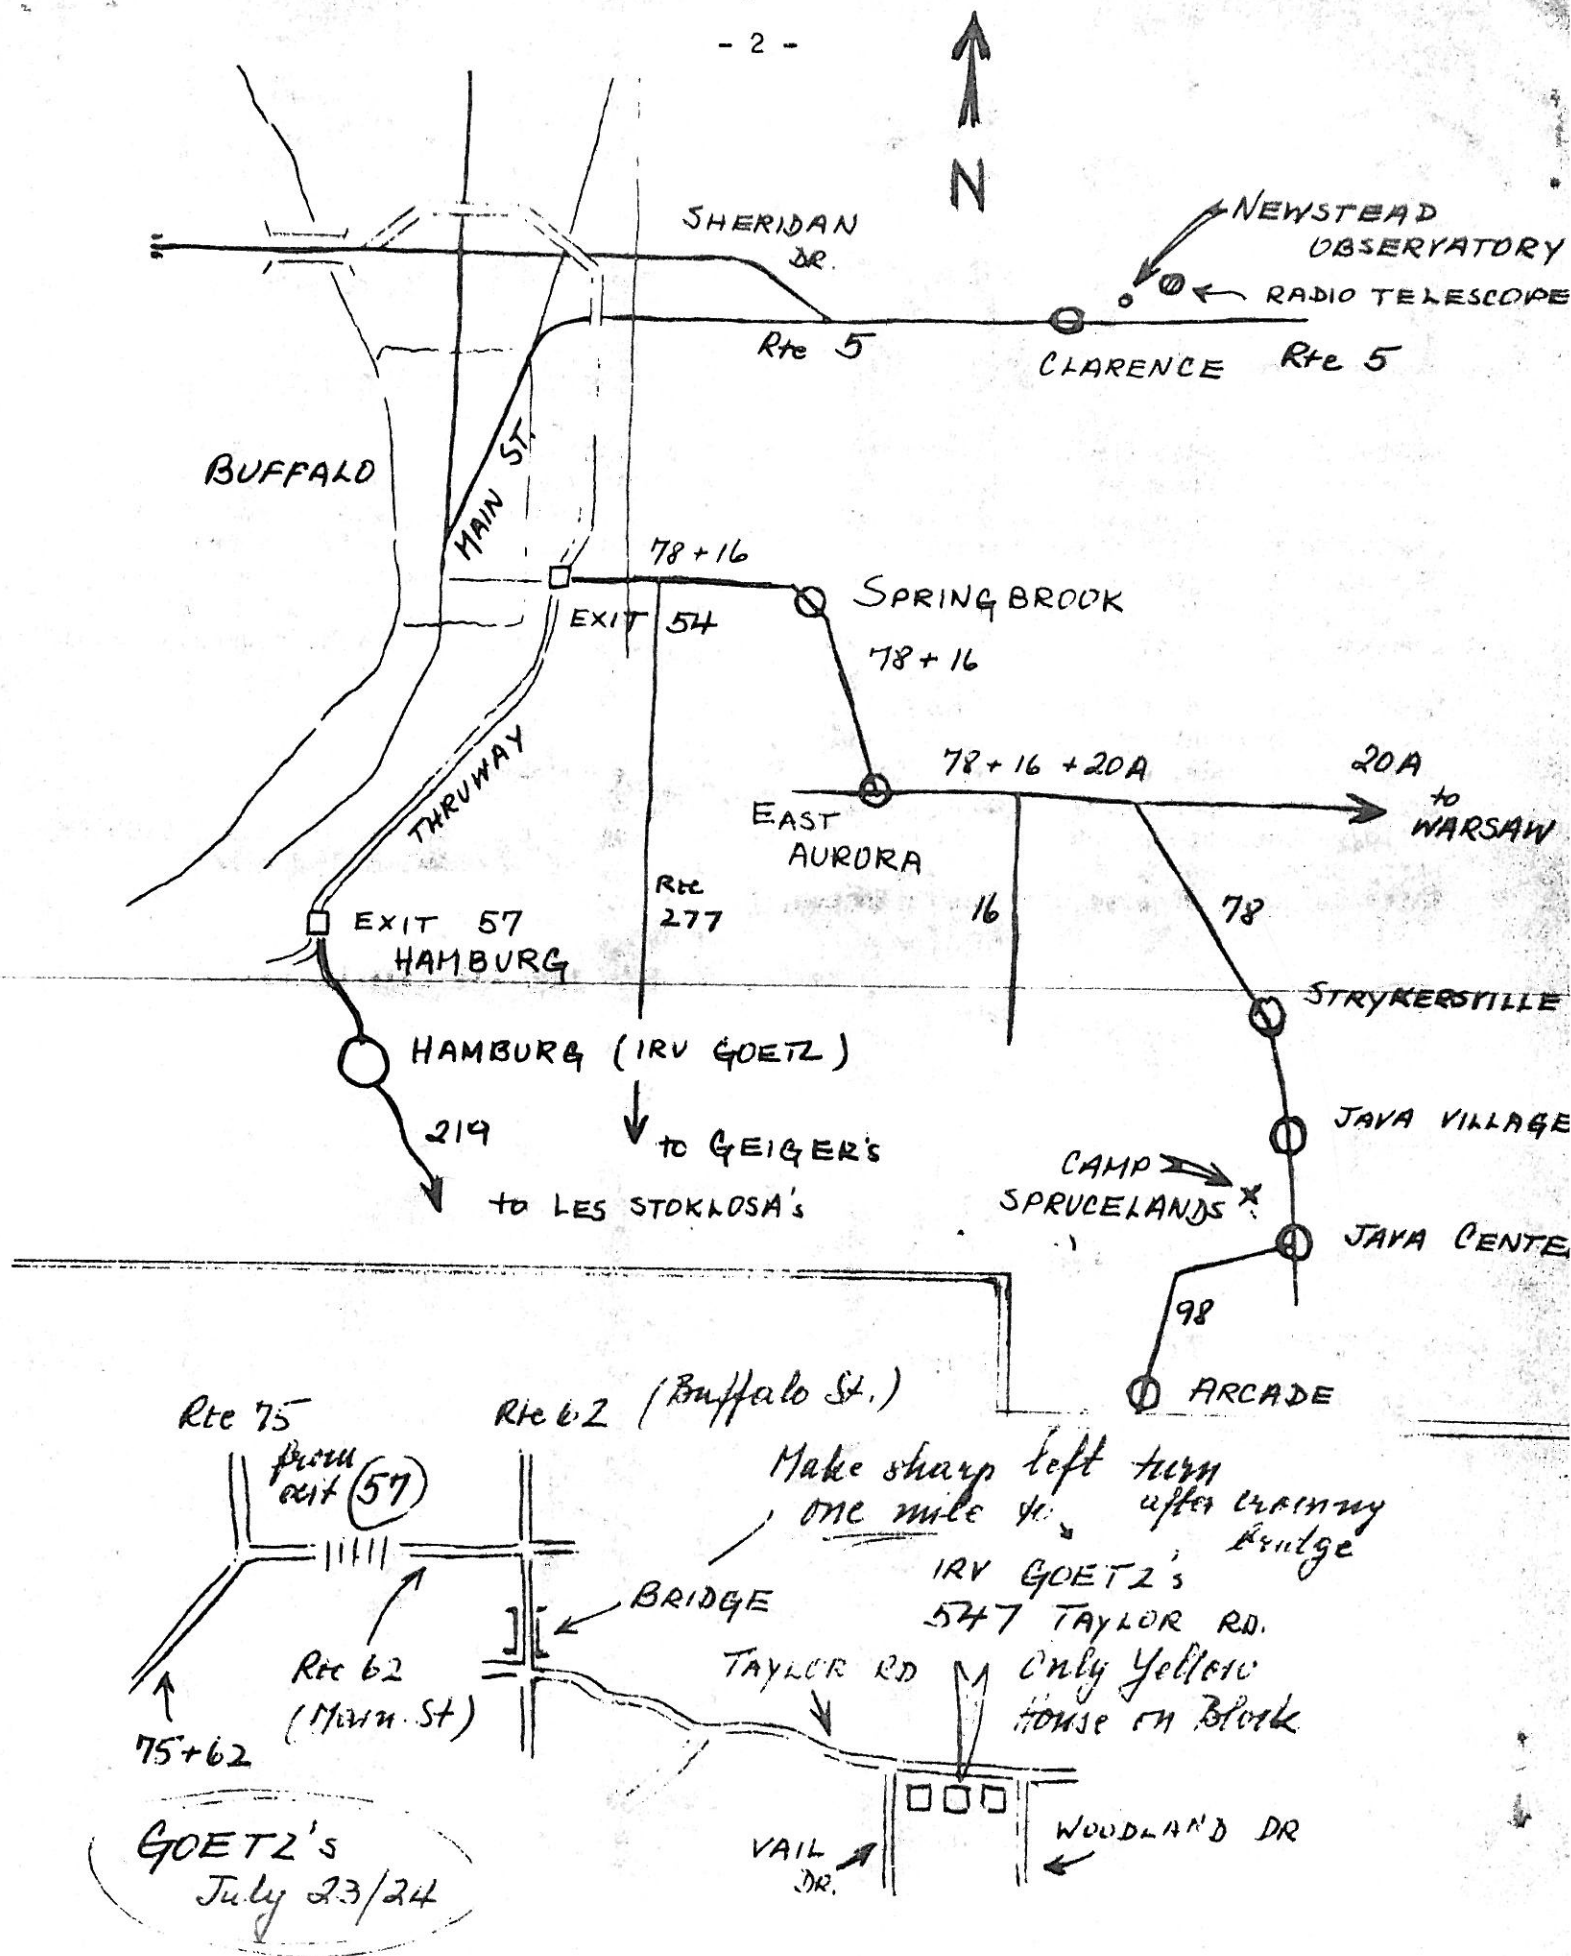

Larry Hazel's home, Niagara Falls, N.Y. = August 13, 14. (1234 84th Street)

Edith Geiger's Observatory, North Boston, N.Y. = August 27, 28.
